

What is Enrichment?

Enrichment activities play an important role in the development of the individual at Willingdon Community School. These give students the opportunity to not only experience the extensive range of activities and clubs offered by the school, but to develop their confidence, responsibility, organisation, leadership and communication.

Aims of Enrichment Clubs

- Students will have opportunities to apply their interests and creative ideas to an area of study of their choice.
- Students will further develop their skills in the areas of: planning, organisation, and time management.
- Students will develop decision making, and self-evaluation skills.
- Students will build self-confidence and commitment.
- Students will develop their independence and creativity
- Students will further develop their ability to work collaboratively with peers from their own year group and other year groups
- Students can develop working relationships with staff outside curriculum lessons
- Students will gain knowledge that goes beyond their programme of study and exam syllabi.

Students may recognise a talent they may not have recognised before.

CODING CLUB/SCRATCH AND PYTHON (Years Groups 7, 8, & 9)

Learn how to program games and write computer programs

Students can work on their coding skills using scratch, html, python and javascript. They can develop websites or interactive games.
